

INTERIOR TRAILER AUTOMATED WASH SYSTEM

CLEAN AND SANITIZE IN AS LITTLE AS TWO MINUTES

INTERIOR TRAILER AUTOMATED WASH SYSTEM

Overview

In 2018 the Food and Drug Administration (FDA) finalized the Food Safety Modernization Act (FSMA) which included a rule for the Sanitary Transportation of Human and Animal Food. This rule raised the bar for the cleaning and sanitation of trailers used in the process of hauling human and animal food by requiring demonstrative records of cleaning. The InterClean Interior Trailer Wash System is designed to effectively clean and sanitize trailers to ensure compliance with the law while minimizing operator inconvenience and cost associated with compliance.

The wash system can be installed on a dock or on a self-contained, movable stand allowing it to wash the interior of trailers or containers. The machine can be equipped with an auto-start feature to eliminate the need for an operator. Simply back a trailer up to the dock or stand and the machine will launch automatically. The wash, rinse, and sanitizing cycles can be completed in as little as two minutes for a typical trailer.

The InterClean system is a simple and rugged design to ensure maximum uptime. The wash system can also be equipped with remote access and a data logging and reporting feature that allows for automated reporting of assets that have been cleaned and sanitized. This combination of user-friendly, durable machine design combined with automated reporting ensures your fleet is always clean, sanitized, and in compliance with current rules and regulations.

Features

- **Data logging and reporting**
 - Users can obtain regular reports that identify the date and time of cleaning specific assets.
- **Simple, rugged, dependable design**
 - Stainless steel frame w/optional powder coat painting
 - Stainless steel, heavy-duty hose reels.
 - Cat pump provides 35 gallons per minute (gpm) at 1200 psi.
Incorporates a powerful cleaning mechanism that can dislodge debris.
 - Four-wheel-drive powered by a hydraulic drivetrain with solid guide wheels.
Our dependable drive mechanism automatically aligns with the trailer and can overcome obstacles in its path.
- **Clean and sanitize in as little as two minutes.**
- **Three-stage cleaning with wash, rinse, and sanitation modes.**
- **Lowers the time, cost, and potential safety risks of employees manually cleaning trailers.**
- **Customizable design to meet site-specific needs.**
