

## INTERPOWER DETERGENTS

All InterPower detergents are specifically designed for use in InterClean Equipment, and other heavy-duty wash equipment, to ensure long and healthy equipment life. InterPower detergents are formulated and proven to provide the most powerful solutions for removing grease, grime, dirt, mud, and other corrosives from trucks, buses, trains, and other heavy-duty vehicles.

The majority of our detergents are environmentally friendly, reclaim safe, and have excellent biodegradability. None of our detergents contain the toxic chemicals HF, ABF, or harmful carcinogens and most do not contain harmful preservatives, quaternary compounds, or phosphates.

## **TRUCK & BUS**

#### INTERPOWER FLEET WASH

Low pH truck and bus detergent that safely and effectively cleans aluminum and road grime while brightening chrome and glass. Use as the first step in two-step cleaning applications with a high pH InterPower detergent.

### **INTERPOWER WASH BLUE #42**

High pH powdered truck and bus detergent used in systems that have mixing tanks. Use as a single step detergent or as the second step in a two-step cleaning application.

#### INTERPOWER TRUCK & TRANSIT

Premium, high pH all-purpose detergent for heavy-duty trucks and buses. Extremely effective when used as a single step application detergent. For the most premier wash, use as a second step detergent with InterPower Fleet Wash as the first step.

# **TRAIN & RAIL**

#### INTERPOWER RAIL BRITE

Low pH train wash detergent that removes dirt, oil, and rust from trains, rails, and other rolling stock. Helps dissolve brake/iron dust particles and remove iron stains from paint. Use as the first step in two-step cleaning process with InterPower Rail Finish or Thunder X-Treme.

#### INTERPOWER RAIL FINISH

High pH train wash detergent that clings to the surface and reduces tension leading to maximum cleaning and corrosion prevention after rinse/flush. It is optimized for quick penetration of iron oxide dust and film. Use as the second step with InterPower Rail Brite as the first step.

## **SPECIALTY**

## INTERPOWER BRUSH LUBE

Neutral pH detergent that improves brush washing effectiveness, protects vehicle surfaces, and enhances brush life. Provides excellent cleaning in cold or warm water. For use in friction cleaning wash systems.

### INTERPOWER SPRAY SHINE

Neutral pH specialty formula that protects vehicles and creates rapid water beading, leaving vehicles with a high shine. Can be used with all wash systems under all wash conditions and water qualities.

### INTERPOWER DEFOAMER

Fast-acting neutralizer that eliminates excessive foaming from water reclaim systems. Used on surfactant-generated foams that can cause cleaning or treatment problems.

### INTERPOWER DEODORIZER

High pH odor eliminator that reduces or eliminates foul odors from reclaim systems or water pits.

### INTERPOWER THUNDER X-TREME

High pH versatile truck, bus, and train detergent that is effective in a wide range of extreme temperature variations. Use as a single step detergent or as the second step with a low pH InterPower detergent as the first step.

### INTERPOWER FAST BUG

High pH specialty formula that penetrates and loosens bug remains. Detergent clings to the vehicle surface allowing maximum contact time leading to easy removal via touchless or friction washing methods.

### INTERPOWER WHEEL SHINE

High pH wheel and tire cleaner that cuts through the most stringent brake dust and mud and leaves the wheels with a lasting shine. Excellent for use with InterClean's Wheel Wash system.

# WHAT MAKES INTERPOWER DETERGENTS DIFFERENT?

#### PROVEN EFFECTIVE AT LOWER VOLUMES:

Our usage rates are lower, which means you use less detergent and save more money.

### DISTRIBUTORS LOCATED WORLDWIDE:

If you need on-site assistance, we are close by.

#### WASH EQUIPMENT EXPERTISE:

Incorrect detergent use can damage equipment. As wash equipment experts, we ensure you get the right detergent for your wash equipment, at the proper dilution amount.

## • COMMITMENT TO CONTINUOUS IMPROVEMENT:

Although our detergents are already best in the industry, we continue to test, improve, and develop detergents for a variety of applications.

#### CUSTOMIZED DETERGENT AND MAINTENANCE PROGRAMS:

Ask our sales or customer service team for more information.
